

Mobile Rolling Grow Rack

Movable multi-tier rolling rack system

Specifications

SPECTRUM	n/a - rack system
COVERAGE	Bench sizes 2.4 / 4.8 / 7.3 / 9.7 m x 1.2 m; custom lengths available
DIMENSIONS	Seedbed tray 4 x 8 ft (1.22 x 2.44 m); tray thickness 3.0 mm; tray depth 60 mm

Key features

- 300kg load rating per tier — the one hard structural number in the system, and the one to design your tray, media and irrigation weight against.
- Hand-cranked rolling base: a block of racks shares a single aisle instead of one aisle per rack.
- Steel frame with electrostatic spray finish over cold galvanising, for a wet, high-humidity room.
- Galvanised steel grating decks under the trays.
- ABS vacuum-formed trays, 4ft x 8ft (1.22 x 2.44m) standard, 3.0mm thick with a 60mm flood depth and UV protection.
- Bench lengths from 2.4m to 9.7m at 1.2m width, or customised; supplied as end, middle and division trays with an aluminium alloy tray frame and valve sump.
- Finish options: white, black, grey or custom.
